

Allen Fetter

Sr. Project Manager, Nuclear Regulatory Commission

Allen Fetter is a senior project manager at the U.S. Nuclear Regulatory Commission (NRC), where he has worked for almost 18 years. He has spent the last 12 years performing both safety and environmental reviews for new reactor licensing. His earlier experience at the NRC was as a technical reviewer for the Yucca Mountain Project, as well as a project manager on numerous complex materials sites and uranium recovery licensing actions.

Earlier in his career, Allen worked as a geologist, hydrologist and project manager in the private sector (BPA Environmental & Engineering, Inc.), and did a multi-year stint as a post-doctoral researcher at UNESP – Rio Claro, São Paulo, Brazil. He received his MS and PhD in Geology (focus on geochronology and isotope geochemistry) from the University of North Carolina at Chapel Hill and the University of Kansas, Lawrence, respectively.
