

## **AnnMarie Marshall**

### **Manager of Configuration Management**

AnnMarie Marshall is a manager of Configuration Management (CM) at Idaho National Laboratory. She has 20+ years of experience in CM and currently manages CM in support of the Molten Chloride Reactor Experiment, Project Pele, and the Nuclear Innovation Reactor Center (NRC) Program. Previous CM manager experience includes the ESBWR, ABWR, and PRISM new plant projects at General Electric-Hitachi Nuclear Energy (GEH). At GEH, AnnMarie also worked as the infrastructure programs manager on the Global Laser Enrichment project. In addition to CM, she has extensive experience in document management, records management and training.
