

Jack Britt

Department Manager

Jack Britt serves as the department manager for the National Reactor Innovation Center. Jack's department focuses on the demonstration infrastructure and support of project partnerships. Before joining INL, Jack worked at Los Alamos National Laboratory (LANL) where he served as executive advisor for the Actinide Material Processing and Power Division. Additionally, he served as a manufacturing manager at LANL where he led both the Plutonium-238 and ARIES (nonproliferation) missions. Jack has over 25 years of nuclear experience, which began with his support of naval nuclear power operations and shipyard overhauls of submarines. After leaving the shipyard, Jack joined URENCO USA where he supported the construction, commissioning, startup, and operations of the nation's only gas centrifuge uranium enrichment plant. While at URENCO, Jack served in the roles of shift manager, deputy operations manager, safeguards manager, and site risk manager. Jack holds a Bachelor of Science in Nuclear Engineering Technology from Thomas Edison State University, a Master of Business Administration from Temple University, and a Master of Engineering from Texas A&M University. Additionally, Jack is a certified Lean Six Sigma Black Belt and Project Management Professional (PMP).
