

Katie Mitchell

Configuration Management Coordinator

Katie Mitchell serves as NRIC's configuration management coordinator, bringing document management and control experience to the role. In this position she works with NRIC's project managers to ensure document processing and quality. She maintains quarterly reporting to support NRIC's demonstration and test bed projects that are paving the way for commercializing advanced nuclear technology.

Katie has a bachelor's degree in business administration and is working toward her master's degree with an emphasis in engineering.
