

Luke Voss

Program Manager

Luke Voss is a program manager for NRIC with experience in engineering, nuclear power, manufacturing and operations. He began his career as a nuclear engineer working for the Department of Defense in at the Puget Sound Naval Shipyard. There he worked on various teams in the nuclear fluids and mechanical systems group to help with the maintenance and overhaul of nuclear power plants on aircraft carriers and submarines. He supported several large U.S. Navy projects around the world. After leaving the DoD, Luke joined L3Harris Technologies as a manufacturing and operations engineer. During his time there, he worked as an engineer, project lead, operations manager and program manager, where he was able to solve many product, process, business and customer problems. After several years with L3Harris, Luke joined Idaho National Laboratory as a technical program manager for NRIC.

Luke graduated from the University of Wyoming with a degree in mechanical engineering. A few years into his professional career, Luke went back to school returned to the University of Wyoming to earn his MBA.
