

Marvin Fielding

Program Manager

Marvin Fielding has 22 years of experience as a consulting civil engineer planning, designing and managing the construction of municipal water, wastewater and transportation infrastructure. Before becoming an engineer, he completed a radiation safety course and worked two summers at the Fernald Feed Materials Production Center in Ohio as a radiation safety technician. Marvin served for six years on the Citizens Advisory Board for the Idaho Cleanup project and completed a master's degree in nuclear engineering from the University of Idaho. His final project explored the use of treated municipal wastewater for nuclear power plant cooling.
